

Prashant Khadka

Baton Rouge, LA

prashant.khadka052@gmail.com | pkhadk2@lsu.edu | [LinkedIn](#) | [Github](#) | [Portfolio](#)

Education

MS in Computer Science , Louisiana State University, <i>Baton Rouge, LA</i> (GPA: 4)	Jan 2024 - Present
BE in Computer Engineering , Pulchowk Campus IOE, Tribhuvan University, <i>Nepal</i> .	Oct 2015 - Sept 2020

Experience

Software Engineer Intern (Summer 2025), <i>PayPal</i>	May 2025 – Aug 2025
--	----------------------------

Research Assistant at BrBytes , <i>LSU, Baton Rouge, LA</i>	Feb 2024 – May 2025
--	----------------------------

Project: BrBytes, [link](#)

- Implement new design for the BrBytes' website in accordance with WCAG compliance.
- Shell script to create the production build of the website.
- Implement new features, API endpoints, and design for BrBytes' teacher portal.
- Mentor and onboard two undergraduate students in the BrBytes project.
- Review pull requests.
- **Technologies:** HTML, Bootstrap, Alpine.js, dhall

Software Engineer (Remote) , <i>Fetchly Labs, Austin, TX</i>	Oct 2023 – Dec 2023
---	----------------------------

Project: Spheric (HR Platform), [link](#)

- Develop a comprehensive page for managing hiring steps.
- Resolve production issues and enhance system stability.
- Implement new features, API endpoints, and designs to improve user experience on the Spheric HR platform.
- **Technologies:** Ruby on Rails, Hotwire, Tailwind CSS

Software Engineer (Remote) , <i>Restarone Solutions Inc., Nepal</i>	April 2022 – Oct 2023
--	------------------------------

Project: Copper CRM, [link](#)

- Develop new features and pages for onboarding-user pipeline.
- Fix production bugs.
- Technical scoping and development of "pipeline" entity's creation-template pages.
- **Technologies:** Ruby on Rails, Ember.js

Project: Violet Rails [Open Source], [link](#)

- Develop and maintain CI/CD pipeline using Dokku and Github Actions. [PR link 1](#), [PR link 2](#)
- Implement reCAPTCHA v2 and v3 in API Data Pipeline. [PR link 1](#), [PR link 2](#)
- Modularize users' access to API Data Pipeline. [PR link](#)
- Rectify in-house email system's threading logic by aligning it with Gmail and GitHub standards. [PR link](#)
- Build in-house analytics page. [PR link 1](#), [PR link 2](#)
- Fix memory leak on Violet Rails' analytics page and its load time by fixing N+1 queries, optimizing and reducing SQL queries, and reducing the number of memory object allocations. [PR link](#)
- Technical scoping, time estimation, and development of an e-commerce project by integrating Printify's API. [PR link](#)
- Create Github Issues, Root Cause Analysis (RCA) of different events, and Documentations. [link](#)
- Merged PRs. [link](#)
- Violet Rails Contributors. [link](#)
- **Technologies:** Ruby on Rails, SQL, jQuery, Heroku, Dokku, Github Actions

Jr. Software Engineer (Remote), Trip101 Pte Ltd., Nepal

Jan 2021 – May 2022

Project: Trip101 CMS, [link](#)

- Migrate a microservice written in vanilla JS to React.js for efficient management of the codebase and for scalability purpose.
- Develop Trip101 CMS from scratch and maintain test coverage.
- Third party API integrations for Expedia, Sonder, and The Apartment Network.
- Develop features for admin panel using "activeadmin" gem.
- **Technologies:** Ruby on Rails, SQL, Angular 2+, React.js, jQuery, Vanilla JS

Associate Software Engineer, Bajra Technologies, Nepal

Jan 2020 – Sept 2020

Project: OHO E-commerce, [link](#)

- Categorization and sub-categorization of products in the e-commerce website using "solidus" gem.
- Logic for banner placements throughout the website for advertisement purpose.
- Implement Elasticsearch for searching functionality using fuzzy search logic and filters to further narrow down the results using aggregations through "searchkick" gem.
- **Technologies:** Ruby on Rails, Angular 2+, Elasticsearch

Technical Skills

- **Programming Languages:** Ruby, JavaScript, Python, SQL
- **Frontend:** HTML, CSS, React, Angular2+, Ember.js, Alpine.js, Bootstrap, Tailwind CSS, Ant Design
- **Backend:** Ruby on Rails, Elasticsearch
- **Database:** PostgreSQL, MySQL
- **CI/CD Tools:** Dokku, Heroku, Docker, GitHub Actions, Shell
- **Testing:** TDD, BDD, Mocking, RSpec, Minitest, Jest, Jasmine, Cypress
- **Tools:** Git, Bash/Shell
